

# JShaft plugins

*This document describes the available plugins for JShaft and the procedure to make new plugins and in consequence improve the possibilities of J-Shaft.*

## Table of contents

1 Available plugins.....	2
2 How to make new plugins ?.....	2

## 1. Available plugins

Currently, two plugins :

- **JShaftP\_ApacheJOnASRepl**
- **JShaftP\_ApacheTomcatRepl**

These two plugins are made to configure this architecture :

### Architecture plugins

The first tier is represented by a single apache server and the second tier by a two (but more is possible) jonas or tomcat servers (it depends what you configure in the configuration file)

## 2. How to make new plugins ?

### Note:

Under construction
